

BOTH SIDES THEY FEAR DISAGREE UNION FEUD

Turkey and the Balkan
Allies in Attitude of
Intractability.

London, Dec. 27.—The peace envoys both of the Balkan states and of Turkey have adopted the expected attitude of intractability toward their opponents' proposed terms of settlement. Each side declared that the other's demands are preposterous.

Third parties who are in touch with both groups of negotiators share this opinion and intimate that a period of whittling is necessary to bring the proposals and counter proposals into such shape as will enable the peace conference, assisted by the friendly pressure of the powers, to strike a bargain. This, it is thought, will occur in due time.

As a matter of fact the proposal of the Balkan allies by which they would come into possession of the coast of the sea of Marmora is regarded as quite as impossible of achievement as is the Turkish demand that the Ottoman empire be allowed to maintain a suzerainty over the coast of the Aegean sea, including the city of Saloniki.

The powers, it is pointed out, would promptly veto the project of the allies, which would, if carried into effect, give Bulgaria practical control of the Dardanelles.

SENATOR BURNED PLAYING SANTA

Garden City, Kan., Dec. 27.—Playing Santa Claus for a house full of children at his home last night almost resulted fatally for William H. Thompson, United States senator-elect. The senator is recovering from severe burns on his hands and singed hair and eyebrows.

While bestowing presents, Senator Thompson's clothing caught fire from candles on the tree. The flames shot up from the fur and cotton trimmings on his costume until he was almost enveloped with fire. The senator, however, quickly threw himself to the floor, wrapped himself in a rug and smothered the flames.

WILLS ESTATE TO HIS TWO SISTERS

Kansas City, Dec. 27.—By the will of W. H. Dixon, a hotel proprietor, filed today, an estate valued at \$300,000 was practically all left to his two sisters, Mrs. Phillie Thumber of Marshall, Mich., and Mrs. Anna Mast of Riverside, Cal., and a niece, Miss Ruby Kleckner, who lives here.

Married women like to board and pretend that they are doing light housekeeping.

HITS CONSERVATION OF CHRISTMAS TREES

Henry S. Graves.

That the agitation carried on by certain conservationists against the Christmas tree has no leg to stand on, is the opinion of Henry S. Graves, chief forester of the United States. The well meaning persons behind the crusade point out that each year between 400,000 young cedars, spruces, firs and pines are sacrificed to give a few days pleasure to the country.

"The cutting of Christmas trees is perfectly compatible with the welfare of the forest," says Mr. Graves. "In fact, when it is done intelligently, it is an actual means of improving the forest and a means of bringing a legitimate revenue from it."

The REAL Financier

Is the woman who keeps house. She makes every dollar do the work of two. She wants her money's worth and the best goods for the money.

Heavy Guard Detailed to
Watch at Inquest Over
James Conway.

Chicago, Dec. 27.—Fear of a renewal of old labor union feuds was seen in police action today in sending heavy guard to watch the witnesses at the inquest over the body of James Conway, who was shot and killed in the offices of the Steamfitters' union Thursday morning as a result of a factional dispute among officers of the organization.

BAD BOY SMITH PLAYS POOL FOR MONEY

George Cavanaugh, charged with drunkenness, appeared before the judge with a badly bruised eye, but he was unable to account for the fact that he was disgraced. As near as he knows, he hurt his eye either by bumping it or being bumped. Outside of the fact that he was drunk, he did no damage and received a suspended sentence.

The case of the city against Clover Smith was set for tomorrow morning to give the city and defendant an opportunity to secure witnesses. Smith is charged with vagrancy and the complaint alleges that he makes a living by playing pool for money. He is known around town by the name of "Bad Boy" Smith.

WEALTH IN A COPPER STRIP

Have you ever noticed the narrow copper strip which is used for fastening large plate glass windows in store fronts? It is the invention of a Kansas City man and is making him rich. He started manufacturing the strips in Kansas City a few years ago and later removed his factory to Niles, Mich. His idea was such a good one that it was imitated.

The Pittsburg Glass company, with offices all over the United States, began buying the invention and using it. The original inventor and manufacturer brought suit against the Pittsburg company for infringement and last Monday Judge Kenesaw M. Landis in the United States district court of northern Illinois ordered a permanent injunction against the Pittsburg Glass company, making or selling the device, and to pay the inventor for such use as has been made of it.

HERO OF CAMPAIGN ON RETIRED LIST

Mexico City, Dec. 27.—General Victoriano Huerta, the hero of the campaign against General Pascual Orozco, the rebel leader, was retired today by the federal war department from the command of the Northern division of the army. General Huerta has been in Mexico City for several weeks and it is stated that he has been undergoing treatment for an affection of the eyes. It is reported that General Huerta has been offered an advisory position in the war department.

General Antonio Rabago has been named to command the northern division in succession to General Huerta.

MEXICANS ASK FOR NEW RULES

Mexico City, Dec. 27.—Although it is stated by the workmen's society that 7,000 men joined the strike on the Mexican Central lines, it was alleged today by the railway executive that a fair percentage of both shopmen and apprentices did not take part in the movement. The men asked for a revision of certain service rules, an eight-hour day, pension system and hospital reforms. The general manager says that he has hopes of an early settlement.

No disorder has been reported, nor has the movement of trains been interfered with.

\$2 COUNTERFEIT NOTE DISCOVERED

Washington, Dec. 27.—A United States secret service operative left Washington today for Clarksburg, W. Va., to take charge of Salvatore Lottello and Fortunato Lobello, charged with passing two dollar counterfeit notes made by the famous Morello-Lupo gang, the leaders of which are now serving long terms in the penitentiary.

Occasionally some of these notes turn up in circulation, indicating that there was a plant somewhere undiscovered in the raid several years ago.

What are the principal activities of the official position our friend occupies?" "Those involved in holding on to it," replied Senator Sorghum.—Washington Star.

MURDERER IS HANGED

Protests Innocence to
Last and Bids Reporters,
Happy New Year

San Quentin, Cal., Dec. 27.—Protesting his innocence to the last and wishing all the newspaper men a happy new year, John S. Rogers was hanged here today for the murder of Benjamin Goodman, a San Francisco jewelry salesman, on November 21, 1911.

Rogers killed Goodman with a hatchet, robbed the body of jewelry worth \$2,500, hid the body in the cellar of the building where he was employed and worked not 10 feet from it for three days.

The night after the murder he gave one of Goodman's rings to a woman of the town. Under examination she broke down and told the police where to look for the rest of the jewelry. All of it that had not been pawned was found in the safe deposit box she named.

MINING NEWS

UNIQUE DIVERSITY OF UTAH'S PRODUCT

Utah is unique among the states in the diversity of its production of precious and semi-precious metals. It does not rank first in the production of any of these metals, but it stands well among the leaders in the production of gold, silver, copper, lead, zinc and vanadium minerals. In the production of lead and silver it ranks third; it ranks fourth in the production of copper, sixth in the production of gold, and seventh in the production of zinc.

Forty per cent of the total production of the state, according to E. W. Parker of the United States geological survey, is derived from the copper mines. The quantity of copper produced in 1911 was 142,340,215 pounds, valued at \$17,792,527. The silver production was valued at \$6,250,500. The principal silver-producing counties are also the chief producers of lead, the output of which was 55,198 short tons, valued at \$4,967,820.

Fourth in Gold.
Gold is the fourth in importance among the metal products of the state, and it amounted in 1911 to 217,020 fine ounces, valued at \$4,486,200. About 25 per cent of the gold is obtained from dry or siliceous ores, but most of the output is obtained in the refining of copper. Some of the lead and zinc ores also produce gold.

Utah's zinc production was 7004 short tons, valued at \$798,456. The value of the metal production of Utah in 1911 was \$34,325,503 out of a total value of all mineral production of \$41,139,076. More than half of the remainder is obtained from coal mines, which in 1911 produced 2,513,175 short tons, valued at \$4,248,666. From 25,000 to 350,000 tons are made into coke annually, chiefly from the slack produced in the coal-mining operations.

The manufacture of Portland cement began in Utah in 1910, with an output of \$11,800 barrels, valued at \$1,005,960. The industry appears to have been overdone in the first year, for the production dropped in 1911 to 652,849 barrels, valued at \$527,523. Clay products of the state consist chiefly of common brick and front brick, with smaller amounts of vitrified brick, drain and other tile, and a small output of pottery. The value of the clay products, exclusive of pottery, was \$548,955 in 1911. The principal stone quarried in Utah is limestone, the larger part of which is used

for flux in the smelters, although some is used for foundation work and for other building purposes. Utah produces also sandstone and granite. Other mineral products are asphalt, precious stones, lime, salt (gathered on the shores of the Great Salt Lake), arsenic, bismuth, graphite, gypsum, mineral waters, petroleum, phosphate rock, pottery, sulphur, vanadium minerals, sand and gravel.

MASON VALLEY MAY USE STEAM SHOVEL

If reports are true that the Mason Valley company is planning to put a steam shovel at work on a portion of its ore deposit, it is significant and very interesting, for it doubtless will mean that both furnaces of the company's custom smelter will be put to work within the early part of 1913. It is reported that the management finds a considerable area of copper ore of sufficient grade and in an approachable condition for steam shovel mining and this can mean only larger production by the company.

It was while raising from the developed ores at depth to open the lime fluxing material showing upon the surface, soon after actual production started at the Mason Valley, that the management found a much larger tonnage of copper ore than was first anticipated, and what promised to be waste or mere fluxing material has been shown to be one of sufficient value to smelt. This was an agreeable surprise for the company, and those knowing the property in anything like a thorough manner believe the installation of a steam shovel, if such really is contemplated, means that the management has found the unexpected tonnages of especially generous extent.

At present the company is operating only one furnace at the smelter, the rated capacity of the two furnaces being 1,900 tons of ore each daily. Doubtless the furnaces will handle more than this amount when crowded, for actual operations have shown the plant to far exceed the nominal capacity.

GIVEN PLACE ON AVIATION BOARD

Brig. Gen. James Allen, U. S. A., is a member of the commission recently appointed by President Taft to consider and report to him for recommendation to congress on the necessity or desirability for the establishment of a national aerodynamical laboratory. Its scope, organization, the most suitable location for it and the cost of installation. It is believed the appointment of the commission was a long step in the direction of securing more scientific information for use in the construction of air-craft.

DEATHS AND FUNERALS

BURTON—Funeral services for John W. Burton will be held in the First ward meeting house Sunday afternoon at 2:30 o'clock. Bishop Engstrom will officiate. The remains will lie in state Saturday afternoon from 4 until 8 o'clock and on Sunday from 10 a. m. until 1:30 p. m., at the family home, 3223 Wall avenue. Interment will be in the Ogden City cemetery.

CHILD—Funeral services for Mark A. Child of Hooper were held in the Hooper meeting house yesterday afternoon. Hundreds of sorrowing friends attended and the capacity of the house was taxed. The services were conducted by C. A. Christensen and impressive addresses were made by the following: John Hooper, C. E. Olsen, Robert Hooper, James R. Beus, Thomas Behnke, A. P. Bigelow and John Watson. The ward choir sang "O My Father" and "Sometime We'll Understand." Interment was in the Hooper cemetery.

"THE RED ROSE"

The Red Rose made such a big hit in Ogden on Christmas day and owing to the sold out house with many people unable to see the production, the management of the Orpheum booked the show for a return engagement next Sunday night. This production will play Ogden for the last time Sunday, Dec. 28th. Seats are now on sale. Advertisement.

"BIG TIM" IS OUT OF SANITARIUM

Yonkers, N. Y., Dec. 27.—Congressman-elect Timothy D. Sullivan, who has been seriously ill in a sanitarium here for nearly two months, is said to have so much recovered that he may be able to appear in Washington for the extra session of congress, which the Democratic administration has decided upon soon after inauguration. "Big Tim" who has long been a prominent figure in the New York legislature, as well as in congress in a previous term, was greeted by friends on the street yesterday for the first time. He declined to discuss his condition but he appeared much improved in health.

SMALL BOYS CAUSE A STREET PANIC

Chicago, Dec. 27.—Halstead street, the longest thoroughfare in the city, was "terrorized" this morning for a few minutes by two boys, James Sacina, and a small friend known as "Little Jimmy," who marched along the sidewalk flourishing daggers and loaded revolvers and sent pedestrians scurrying to shelter.

A policeman took the boys in hand, but "Little Jimmy" eluded the officer on the way to the police station.

"We was just having some fun scaring people," said James, who has been in the parental school. "We wasn't going to hurt anybody."

MUNICIPAL BANK PLAN FOR SEATTLE

Seattle, Wash., Dec. 27.—The first step toward establishment of a municipal bank for Seattle was taken yesterday when the judiciary committee of the city council recommended the submission to the voters next March of a charter amendment authorizing the council to engage in the banking business.

Promoters of the plan say the legislature will promptly pass necessary legislation should the project be approved by the voters.

WOMAN IS SHOT AT A WEDDING

Windsor, Colo., Dec. 27.—A child born to Mrs. Frederick Bruner by means of a caesarian operation, after Mrs. Bruner had been shot in the abdomen at a wedding here last night, died a few hours after birth. Mrs. Bruner is expected to recover.

John Lindt and Jacob Lichtenwald, two wedding guests who were firing revolvers, are held here pending the outcome of the woman's injuries, but the authorities say the shooting was accidental.

Mrs. Bruner was congratulating the bride at German-Russian wedding when she was struck in the back by a revolver bullet. The ball passed through the stomach, lodged in the wall of the abdomen. The woman was hurried to a hospital, where surgeons decided upon a caesarian operation as the only means of saving her life and that of the unborn child. The operation appeared successful, and at first it was believed that both mother and child would recover.

FAMOUS AND VENERABLE "POET OF THE SIERRAS" SINKING IN CALIFORNIA HOME

Joaquin Miller.

Joaquin Miller, the aged "Poet of the Sierras," whose poems of the west have enjoyed a wide popularity, is now well-tired down by his years and confined to his bed at his picturesque home, "The Heights," Fruitvale, California. The accompanying picture, which is the latest that has been taken of him, shows the poet propped up in bed.
